

## REMARKS

### I. The Section 112 Rejection

The Examiner has objected to the disclosure under 37 C.F.R. §1.63(a), on the basis that the specification presents less than a full and complete botanical description of the plant and the characteristics which distinguish the plant from related known varieties. Claim 1 stands rejected under 35 U.S.C. § 112, first and second paragraphs, as not being supported by a clear and complete botanical description of the plant for the reasons set forth in the Examiner's objection to the disclosure.

The specification has been amended, as suggested by the Examiner, to make a full and complete a disclosure of the plant and the characteristics that distinguish it from other related known varieties and antecedents. With reference to the red-lined version, the specification has been amended at page 2, line 21, to indicate that it is the female parent variety that is being compared to the variety that is the subject of his application.

At page 3, lines 5-16, the specification has been amended to include a comparison of the instant variety with the male parent variety 'Leyla.'

There are no amendments to the claim or Abstract.

The above amendments to the specification have addressed the remaining Examiner's objections to the disclosure under 37 C.F.R. §1.63, first paragraph and under 35 U.S.C. § 112, first and second paragraphs. It is respectfully submitted that those objections are now overcome. As a consequence, the basis for the Examiner's rejection under 35 U.S.C. § 112, first and second paragraphs, is no longer present and it is respectfully requested that the rejection on this basis be withdrawn.

### CONCLUSION

It is respectfully submitted that the Examiner's rejection under 35 U.S.C. § 112 has been overcome by the above-amendments and remarks and should be withdrawn. There are no further rejections or objections to the disclosure or the claim and the application is now believed to be in condition for allowance.
